

Subject: Survey to Assess Spatial Access to Pharmacies across Vermont

To whom it may concern,

This pharmacy location is being invited to participate in a study that measures the spatial accessibility of pharmacy care throughout Vermont. This research project is conducted by Sam Roubin and Dr. Holler, a Middlebury College student and professor of Geography. We would like to ask you a series of short questions to learn about the hours of operation and staffing levels of your pharmacy. The survey should take about 3 minutes to complete. If possible, we would request that the store manager or supervising pharmacist complete the survey.

The survey link is enclosed below:

We believe that our research has important implications for public health planning in the state.

Thank you,  
Sam Roubin
